INTERACTIVE TOOLS

Maintain your delegate's attention and give your audiences a more connected, immersive event year on year using our flexible and affordable tablet-based system.

A common complaint at corporate conferences is of 'death by PowerPoint' – instead, imagine a parallel universe in which your speakers and organisers will be able to have instant feedback during presentations, live and anonymous Q&A and bespoke content!

Guests can use the state of the tablets at their tables to vote, ask questions and send comments which are moderated by our staff – as well as for Event Measurement to discover the effectiveness of your event against set objectives.

AUDIO VISUAL SOLUTIONS

The majority of venues now provide a screen & projector as standard – which is more than sufficient for every day small meetings.

However for larger and/or higher-profile events, having the right platform to present your conference, latest product innovation or awards ceremony is so important - with AV playing a critical part in creating the correct atmosphere, and thus ensuring that your messages are clearly heard, seen and felt by your audiences.

In our experience, knowing how much and what style of Audio Visual solution you need for your events can be a technical minefield - that is why we aim to simplify that for you by making our AV easy to understand!
